HARSHVARDHAN ANIL SHARMA

Aspiring Software Developer (Java & Backend) | Java • Servlets • JDBC • MySQL • SQL

+91 8830923558 | harshs2227@gmail.com | LinkedIn | GitHub | Portfolio

CAREER OBJECTIVE

B.Sc. Computer Science graduate currently pursuing M.Sc. Computer Science, seeking an entry-level software development or backend engineering role where I can apply my knowledge of Java, Servlets, JDBC, SQL, object-oriented programming, and layered architecture while learning and contributing to organizational objectives.

EDUCATION

- M.Sc. Computer Science from DES Pune University, Pune (Pursuing)
- Bachelors of Computer Science from Dnyanvardhini college, July 2023 – April 2026
- 12th in science from Nirmal Bethany junior college, 2023
- 10th from Jai Hind High School,2021

TECHNICAL SKILLS

- **Languages:** Java, Core Java (OOP, Inheritance, Arrays, Collections Framework), C, Python
- **Java Web:** JDBC, Servlets, JSP, Dynamic Web Projects
- **Frameworks & ORM:** Spring, Spring Boot, Hibernate
- **Backend / Architecture:** Layered Architecture, Modular Architecture, Maven
- **Databases:** MySQL, PostgreSQL, SQL, DBMS
- **Frontend:** HTML, CSS, JavaScript, Bootstrap, Tailwind CSS
- **Tools:** MySQL Workbench, Apache Tomcat, Git, GitHub, Eclipse, Antigravity, LaTeX

PROJECTS

QuickServe – Service Marketplace Web Application

- Developed a full-stack web application using Java, Jakarta Servlets, JSP, JDBC, MySQL, HTML, CSS, Bootstrap, and JavaScript.
- Implemented a layered architecture using Controller, Service, DAO, and POJO/DTO components.
- Designed a relational database with interconnected tables, foreign-key constraints, and SQL joins.
- Integrated server-side request handling, database operations, session management, role-based access control, exception handling, and custom error pages.

CGPA Calculator System *(Ongoing)*

- Developing a Java-based application to calculate SGPA and CGPA of students.
- Designing database connectivity using PostgreSQL to store and manage student academic records.
- Implementing core Java and SQL concepts for data validation and calculations.

Automatic Light Control System using PIR Sensor

- Built an automatic lighting system that activates on motion detection.
- Used PIR sensor, Arduino Uno, and Arduino IDE for coding and hardware integration.
- Demonstrated logical problem-solving and basic embedded system knowledge.

CERTIFICATIONS & ACHIEVEMENTS

- **Smart India Hackathon (SIH) 2026 – Internal Round (Certificate):** Selected for the second round of the college-level internal selection as part of **Team Dristicare**, working on an AI-based diabetic retinopathy screening solution focused on explainable AI for early screening in rural healthcare settings.
- **Java Full Stack Development – Kiran Academy, Pune** *(Ongoing)*

STRENGTHS

Logical and analytical thinking | Willingness to learn new technologies | Attention to detail

Languages known: English, Hindi, Marathi
